# Activity

- Please download and install Endnote
  - <https://www.uow.edu.au/library/endnote/>
  - **Follow the installation guide.** If you don't you won't install the license.

EndNote is reference management software used to manage bibliographies and references.

## Using EndNote at UOW

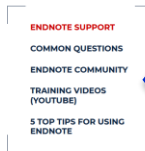

Use EndNote to:

- manage information sources when writing essays, articles and theses.
- store information sources such as journal articles, ebooks and more.
- format and generate your reference list/bibliography in Microsoft Word using the citation style of your choice.

Our site licence allows all current UOW students and staff to download and use EndNote.

Although EndNote is available to all students, it is designed for postgraduate and research students who typically need to manage a very high number of references. If you're an undergraduate student, you may like to explore some [alternative referencing tools](#) before deciding to use EndNote.

EndNote is available on most computers across UOW campuses. The current version supported by UOW is **EndNote X9**.

## EndNote learning resources

# Installing EndNote

## For Windows

1. **Download EndnoteX9win.zip** (Log in with your UOW username and password when prompted).
2. Find the downloaded file EndnoteX9win.zip in your Downloads folder or search for it on your computer.
3. Right-click on EndnoteX9win.zip and select "Extract All" (or select "Send to", then "Extract here (in new folder)").
4. The folder EndnoteX9win should open automatically.
5. There should be two files: ENX9Inst.msi and Licence.dat.
6. Double-click ENX9Inst.msi to run the install and follow the prompts.

## For macOS

1. **Download EndnoteX9mac.dmg** (Log in with your UOW username and password when prompted).
2. Find the downloaded file EndnoteX9mac.dmg in your Downloads folder and double-click it to mount the disk image.
3. Double-click EndNoteX9.pkg and follow the prompts.

# Installing EndNote for Windows

This video shows you the steps to download and install EndNote for Windows.

**Installing EndNote**

**For Windows**

1. **Download EndnoteX9win.zip** (Log in with your UOW username and password when prompted).
2. Find the downloaded file EndnoteX9win.zip in your Downloads folder or search for it on your computer.
3. Right-click on EndnoteX9win.zip and select "Extract All" (or select "Send to", then "Extract here (in new folder)").
4. The folder EndnoteX9win should open automatically.
5. There should be two files: ENX9Inst.msi and Licence.dat.
6. Double-click ENX9Inst.msi to run the install and follow the prompts.

**For macOS**

1. **Download EndnoteX9mac.dmg** (Log in with your UOW username and password when prompted).
2. Find the downloaded file EndnoteX9mac.dmg in your Downloads folder and double-click it to mount the disk image.
3. Double-click EndNoteX9.pkg and follow the prompts.

**Installing the UOW Harvard style for EndNote**

Check your Subject Outline for information about what referencing style you should be using. Popular styles at UOW are UOW Harvard (author-date), APA, AGLC and Footnoting.

If you are using UOW Harvard, you will need to download and manually install the EndNote style for it.

1. Ensure you already have EndNote installed on your computer (see instructions above).
